## Monash Biotechnology Infrastructure Tour

BPN is pleased to announce a tour of three significant infrastructure sites at Monash University on Wednesday 6th April at 6:00pm.

The tours have been made possible through the support of Ed Nice, Milton Hearn and Mathew Wilce and will include the:

- Monash Antibody Technologies Facility
- NCRIS Recombinant Protein Feeder Facility (Centre for Green Chemistry)
- X-ray Crystallography Unit (Dept Biochem Mol Biol)

This represents an excellent opportunity to inspect and learn more about these world class facilities and explore how they may feature in any possible future work.

Admission will be \$10 and will be limited to 50 people.

Attendees will be expected to gather at 5:30 pm for a 6:00 pm start. This will be followed by 3 alternating concurrent tours of each facility of approximately 30 minutes each.

Light refreshments will be provided before and after the tours.

Please book at : <http://www.trybooking.com/9202>

Address any queries to: [Joe.Bertolini@csl.com.au](mailto:Joe.Bertolini@csl.com.au)

### Directions

<http://www.monash.edu.au/pubs/maps/3-Claytoncolour.pdf>

The tour will commence at STRIP Building 75. Parking will be available adjacent to the building.
